- Being a member of the TWC, I have initiated the work of bug reporting with the web application HyLyt- by SocioRac available. Here, I performed the provided tasks as per the requirement and was also awarded and rewarded for the same as an intern.

Php Internship

BrainyBeam Technologies Pvt. Ltd.

June 2022-July 2022

- An internship into Php with BrainyBeam Technology Pvt. Ltd. My duties and assignments for this position are as follows: Working with different Modules of respective technology i.e, Php to develop the assigned project.

  Project Title: Employee management System

  Abstract of Project : This system is intended to develop an employee management system for the organization which is capable of managing various activities such as attendance management, salary management etc.

Web Development Internship

BarodaWeb : The e-catalogue Designer
January 2023-July 2023(ongoing)

- As an intern, my responsibility at BarodaWeb was to cover all aspects of building web applications to become a web developer. This requires basic knowledge of designing tools like <u>HTML, CSS, Bootstrap, JavaScript</u>, etc. and backend scripting languages such as <u>ASP.net</u>. And for designing tools like <u>Photoshop</u> were used.

  The main responsibility was to ensure that the proposed responsive web application would appeal to the desired target audience and as a result would attract their attention and also include working knowledge of various web browsers. While learning about web development, I also got information about user interface design. During the internship period, I mainly worked on multiple web applications projects based on front end designing as well as other projects dealing with MVC's.

  The skills I developed during this internship includes :

  HTML , CSS , Bootstrap , JavaScript , Asp.Net , Php, Photoshop, Responsive Design

  Handling **MVC admin sites.**

EDUCATION

Bachelor of Engineering (BE), Computer Science & Engineering

ITM(SLS) Baroda University (GTU Affiliated)

2019 - 2023

Current CGPA: 8.90/10

Current CPI: 8.57/10

Senior Secondary (XII), Science

Bright School

(GSEB board)

Year of completion: 2019

Percentile rank: 7.83/10

Secondary (X)

Bright School

(GSEB board)

Year of completion: 2017

Percentile rank: 9.63/10

PROJECTS

Smart Card System

Smart card is unique identity card for students at institutions which gives info marks, attendance criteria, exam updates, submissions, fee details etc .It has a unique QR code assigned to each student from which one can get the details of the student information such as attendance, fee information,marks , submission details,etc.

Developed a front end webpage using HTML CSS & JS where students can login to get the details. Also Created a working prototype for the same.

Web Designing Project

The main objective of this internship was completing different client projects on WEBSITE DESIGN AND DEVELOPMENT as per their requirements. Several programming languages that are in these projects develop web based applications or software. Some of them are only used for the UI and front end of the application, some are used for the backend design of the software. For example HTML3, HTML4, HTML5, CSS, Bootstrap Framework ,JS Etc. are some programming languages to develop the frontend of an application. ASP.NET ,PHP ,etc are used at the backend.

AWARDS

Was Rewarded With cash price for a new innovative suggestion to make app more effective during Bug Reporting Internship .
